

Shourav Rakshit Ivan

8253652839 | [Portfolio](#) | [Linkedin](#) | [Email](#)

AI Software Developer | Software Engineer | Computer Science Graduate

Education

University of Calgary

Canada, Calgary

Bachelor of Science (BSc) in Computer Science

Sep 2020 – Dec 2025

- GPA: 3.6 / 4.0
- Relevant Courses: DBMS, Web-Based Systems, iProgramming, Software Project Management, Natural Language Processing

Technical Skills

Languages: Python, Java, HTML, Swift, CSS, JavaScript, MySQL, PostgreSQL, VBA, Microsoft SQL Server

Frameworks: React, Next.js, Django, Flask, FastAPI, Express.js, LangChain, TensorFlow, PyTorch, OpenCV

Developer Tools: Docker, Power BI, Xcode, Firebase Databricks, Microsoft Azure, HuggingFace, OpenAI API, Anthropic API

Others: Linux, D2L, Office, Excel, PowerPoint, SharePoint, Teams, Access, OneDrive, JIRA, Figma, Confluence

Experience

[SynergyLoft](#)

June 2025 – Present

AP Services: AI Software Engineer

Canada, Calgary

- Built an **AP automation pipeline** ingesting **7,000+ emails** and **attachments** via **Microsoft Graph API** with **SHA-256 deduplication**, multi-format extraction (**pdfplumber**, **Tesseract OCR**, **pandas**), and two-stage normalization reducing document noise by **40%**.
- Engineered a **timesheet approval extraction system** using **Claude Opus API** with **6 prompt refinement cycles**, generating **700 human-reviewed labels** across **4 document classification types** for downstream model fine-tuning.
- Implemented **multi-stage document classification** using **LayoutLMv3** and **Longformer** achieving **98% accuracy** for page-level separation of mixed financial documents.
- Fine-tuned **Qwen** with **LoRA/QLoRA** on **700+** curated financial documents, achieving **98.8%** exact match on metadata extraction across a **6-field JSON** schema
- Built a **350+** test suite with **pytest** covering pipeline edge cases; maintained sprint documentation in **JIRA/Confluence** across iterative delivery cycles
- Automated document ingestion from **Google Workspace** via **Google Drive API** with scheduled cron polling for new attachments, replacing a manual retrieval process

DPS Logistics: Full Stack Developer

February 2026 – Present

Canada, Calgary

- Architected a **multi-tenant logistics platform** with **4-tier RBAC** (superadmin, admin, dispatcher, carrier), managing **6,300+ deliveries**, **1,900+ carriers**, and **1,000+ customers** with real-time order tracking, status workflows, and audit logging.
- Engineered a **dual-currency billing system** (CAD/USD) with live **Bank of Canada API** exchange rates, automated margin calculations, and bulk **PDF/CSV invoice generation** for cross-border financial reporting.
- Migrated **10,000+ legacy records** into normalized **PostgreSQL** via custom ETL scripts with idempotent conflict handling and customer deduplication, achieving **zero data loss** across production deployments.
- Integrated **Google Maps** Platform (Places Autocomplete, Geocoding, Directions) to enforce address validation at input and surface interactive multi-stop route maps, reducing dispatch entry errors
- Deployed full-stack platform on **Railway** via **Docker Compose** and **GitHub CI/CD** with environment-isolated staging and production branches, **JWT/bcrypt auth**, and enforced 12-month password history

Projects

[JobHunter](#): (Automated Job Scraper)

Jan 2025 – Present

Data Scientist / Full Stack Developer

Canada, Calgary

- Developed a full-stack job application using **Django REST Framework**, **React**, and web scraping (**Selenium**, **BeautifulSoup**) to extract data from 50+ job portals, reducing search time by 70% and storing 10,000+ records in **MongoDB**.
- Applied **NLP** techniques to clean and categorize 100% of jobs, improving search relevance by **40%**, and implemented **LLM**-powered features such as semantic search and job description summarization using models like **LLaMA** and **DeepSeek**.

Tools/Technologies: Python, DRF, React, MongoDB, Power BI, Docker, LLaMA, DeepSeek, Azure Databricks, SQL

FlatMates

Jan 2025 – Present

IOS Developer

Canada, Calgary

- Developed a swipe-based roommate matching system using **SwiftUI**, enhancing user experience through an intuitive and interactive UI.
- Integrated **Firebase** Authentication and **Firestore** for secure user registration, real-time chat, and profile management, ensuring seamless data storage and retrieval.
- Demonstrated adaptability and problem-solving under tight deadlines, contributing to a **30%** reduction in bug resolution time through collaborative troubleshooting.

Tools/Technologies: Swift, Firebase, LLM (LLama), Pixabay API, Xcode, MVVM, Git

ExploreNow

Sep 2024 – Present

IOS Developer

Canada, Calgary

- Collaborated with a 4-person Agile team using **Scrum** methodology with bi-weekly sprints and retrospectives to develop and deploy a feature-rich iOS travel app using Swift and SwiftUI, integrating **Pixabay** and **OpenWeather APIs** for dynamic content and real-time weather updates.
- Led UI/UX design for the ExploreNow iOS app using **Figma** and **SwiftUI**, ensuring accessibility and mobile responsiveness; developed wireframes and prototypes based on user journey flows.
- Optimized real-time messaging functionality using **Firebase Firestore**, reducing data retrieval latency by **30%**, leading to a smoother user experience.

Tools/Technologies: Swift, Firebase, Pixabay API, Open Weather API, Mapkit, Xcode, MVVM, Git
